Professional Experiences

PhD - Inductive logic programming, HomiLung project — Nantes, France
Ecole Centrale Nantes, VELO-LS2N — 10/2025 - Present

- **Director: Morgan Magnin (Pr.), Co-supervisor: Tony Ribeiro (PhD)**
- ***Inductive logic programming for the identification of markers predisposing to hospital-aquired pneumonia.***

Apprentice - Metabolic modelling of bacterial communities, COMIC Project — Bordeaux, France
Pléïade Team, Inria Bordeaux — 09/2024 - 09/2025

- **Supervisor: Clémence Frioux (Dr.)**
- Study of bacterial interactions in cyanobacterial community through metabolic modelling and metabolomics

Intern - Metabolic modelling of bacterial communities, COMIC Project — Bordeaux, France
UMR Nutrition Humaine, INRAE Clermont — 04/2024 - 09/2024

Intern - Identifying the target population for a treatment — Paris, France
Market Access, Abbvie Pharmaceutical — 05/2023 - 08/2023

- Identification of French target population for second-line treatment of overactive bladder

Scientific Dissemination

Publication

Integrating metagenome-scale metabolic models and metabolomics to explore candidate biochemical interactions in cultivated Microcystis phycospheres, ISME Communications — 2026

Oral Presentations

Talk, Annual meeting of the french work group on systemic and symbolic biology (*GT BIOSS*), Paris, France — 2025
Talk, Journées Ouvertes de Biologie, Informatique, et Mathématiques, Bordeaux, France — 2025
Flash talk, Journées Ouvertes de Biologie, Informatique, et Mathématiques, Toulouse, France — 2024

Poster

Journées Ouvertes de Biologie, Informatique, et Mathématiques, Toulouse, France — 2024

Education

Université Paris Cité — Paris, France
MSc, Bioinformatics — 2023 - 2025

- Thesis: *Metagenome-scale modelling of freshwater cyanobacteria-centered community in the context of harmful blooms*

Université Paris Cité — Paris, France
Bachelor, Biomedical Sciences (Biochemistry, Infectious Agents Biology and Biostatistics) — 2020 - 2023

- Thesis: *Partnership between the mucosal barrier, mucus, mucins, and the intestinal microbiota*

Technical Skills

Programming
Python, R, Bash scripting, version control (Git), CLI, logic programming (beginner level to ASP)

Genomics and Metagenomics
Genome analysis, functionnal analysis (annotations, KEGG/EC enrichment), metabolic modelling (M2M, Gapseq)

Networks and Graph Analysis
Metabolic networks (SBML), gene regulatory networks (NetworkX, Cytoscape)

Machine Learning
TensorFlow, scikit-learn, pytorch

Misc.

Awards and Grant

Grant of the Best Oral Presentation, from the *Société Française de Bioinformatique*, JOBIM 2025

Languages

French (C2), English (C1), Mandarin (A2)
